

IDEAL IMPLANT

Natural feel. Beautiful look. Peace of mind.

Now there are three types of breast implants: saline, silicone gel and the NEW structured implant.

The structured IDEAL IMPLANT uses new technology to offer a natural feel and beautiful look with only saline inside for your peace of mind. Choose the IDEAL IMPLANT and enjoy advantages over saline and silicone gel implants.

The IDEAL IMPLANT Difference

- Lower rupture rate and higher rupture strength—no silent rupture
- No MRI needed—look in the mirror to know that your implants are intact
- No sticky silicone gel from ruptured implants in the surrounding tissue
- Filled with saline that is safely absorbed by the body if ruptured
- Allows a smaller incision than silicone gel implants

You deserve beauty without compromise.
